Note: The above mentioned finishes represent doors and drawerfront, not the whole furniture.

1 Important: The Allegria Collection in the Optimum Series when in melamine finish has the curved doors of the lavatory module in laminate. Because the melamine cannot be curved, we have no choice than having the two bow front doors underneath the sink in laminate while the other doors and drawers are in melamine. Some laminate colors (*) are slightly more matte than the melamine but we feel that the match between the melamine and the laminate is acceptable.
