

STYLES AND FINISHES : Doors and drawerfronts

CONTEMPORARY - FLAT PANELS

Wood Veneer (maple, beech, "riftcut" oak veneer)

Real timber wood sliced *Select Royal* veneer with a cut exclusive to Vanico-Maronyx characterized by a linear graining and almost invisible matching. Protected by two coats of clear waterproof **lacquer****.

ADVANTAGES: The beauty of wood in a modern environment. Easy-to-care.

MDF Lacquer

Excel medium density fiberboard (density 32 % higher than standard MDF), covered with opaque colored lacquer, then sealed with clear waterproof **lacquer****.

ADVANTAGES: Allows to illuminate the room with clear colors such as white. Easy-to-care.

Thermo

Computer-assisted thermoforming onto an *Excel* MDF panel (density 32% higher than standard MDF). White melamine back panel.

ADVANTAGES: Very robust - look amazingly like wood - treated against yellowing - waterproof.

Laminate

High pressure laminate in a contemporary collection of durable and resilient surfaces.

ADVANTAGES: Waterproof - resistant - good price quality ratio. Easy-to-care.

Melamine

Laminated plastic baked on hardwood particles pressed at 350 lb/sq in.

ADVANTAGES: Inexpensive - resist beautifully to impact and scratches. Easy-to-care.

HERITAGE - RAISED PANELS

Solid Wood (maple)

Solid wood *Select Royal* quality, protected with two coats of clear waterproof **lacquer****.

ADVANTAGES: Gives all the richness and sensuality of solid wood.

MDF Lacquer & Oxidized lacquer

Excel medium density fiberboard (density 32 % higher than standard MDF), grooved and covered with colored lacquer, then sealed with clear waterproof **lacquer****.

ADVANTAGES: The elegance of molded doors at a lower price than wood. Allows to illuminate the room with clear colors such as white. Easy-to-care.

MDF Wood (maple)

Excel medium density fiberboard (density 32% higher than standard MDF) covered with a slice of wood, grooved and then finished with clear waterproof **lacquer****.

ADVANTAGES: Gives the warmth of wood at a manageable price.

Thermo

Computer-assisted thermoforming onto an *Excel* MDF panel (density 32% higher than standard MDF). White melamine back panel.

ADVANTAGES: Very robust - look amazingly like wood - treated against yellowing - nice edges - waterproof.

Heritage Melamine

Melamine panel with applied molding.

ADVANTAGES : Inexpensive - resist beautifully to impact and scratches.

Innovation Melamine

Melamine panel with integrated molding.

ADVANTAGES : Inexpensive - resist beautifully to impact and scratches. Easy-to-care.

SHAKER STYLE - WITH GROOVE

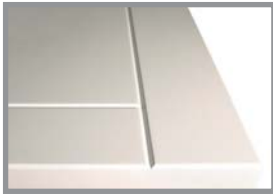

MDF Wood (maple)

Excel medium density fiberboard (density 32% higher than standard MDF) covered with a slice of wood, grooved and then finished with clear waterproof **lacquer****.

ADVANTAGES: Gives the warmth of wood at a manageable price. Easy-to-care.

MDF Lacquer

Excel medium density fiberboard (density 32% higher than standard MDF), grooved and covered with colored lacquer, then sealed with clear waterproof **lacquer****.

ADVANTAGES: The elegance of molded doors at a lower price than wood. Allow to have clear colors such as white. Easy-to-care.

Thermo

Computer-assisted thermoforming onto an *Excel* MDF panel (density 32% higher than standard MDF). White melamine back panel.

ADVANTAGES: Very robust - look amazingly like wood - treated against yellowing - nice edges - waterproof. Easy-to-care.

RUSTIC SHAKER - WITH GROOVE

Solid Wood (maple) - **Rustic Collection only**

Solid wood *Select Royal* quality, protected with two coats of clear waterproof **lacquer****.

ADVANTAGES: Gives all the richness and sensuality of solid wood.

****PROTECTIVE LACQUER**
for solid wood, wood veneer & MDF wood

Application: 2 coats of lacquer applied in cross coats, (horizontally and vertically) to properly seal the pores of the wood.

Robust: Waterproofing and non-yellowing lacquer containing 40% of solid matter, for optimal resistance to shocks, scratches and heat.

Ecological: Meets the E-1 European Environmental norms requirements for the lower Formaldehyde emission rate. Classified TR-4 AWI (Architectural Wood Working Institute).

Durable: Final thickness of 4 to 5 mil, which is close to double the industry standard.

Resistant: Meets the ANSI/KCMA resistance requirements against water, detergent and other products such as alcohol, coffee, mercurochrome, cosmetics, etc.

Waterproof: Resistant to humidity. Resistant to a 24-hour under water test.

SHAKER - WITHOUT GROOVE

Solid Wood (maple) - **Classic, Prisma, Tango only**

Solid wood *Select Royal* quality, protected with two coats of clear waterproof **lacquer****.

ADVANTAGES: Gives all the richness and sensuality of solid wood.
